EDUCATION

University at Albany, SUNY, PhD, Economics (Econometrics) Aug '12 – Apr '19 (Expected)
IIT Kanpur (Kanpur, India), Integrated M. Sc., Economics Aug '07 – May '12

Courses: Time Series Analysis (A⁻), Applied Economics (A⁻), Linear Algebra (8/10), Programming Tools and Techniques (10/10), Mathematical Modeling (10/10), Probability and Statistics (8/10), Fundamentals of Computing (8/10)

Online Courses: Machine Learning, Statistical Inference, The Data Scientist's Tool Box

TECHNICAL SKILLS

- R, Python (proficient); pandas, SQL, UNIX/Linux (competent)
- Hypothesis Testing, Probability, Causal Inference
- Linear/logistic regression, Random Forests, Gradient Boosting

QUANTITATIVE & PROGRAMMING EXPERIENCE

Ride-share and motor-vehicle crashes

Graduate Researcher, University at Albany, SUNY Jan '18 – Present

- Isolated impact of ride-sharing in Illinois on crash rate by controlling for variables influencing entry of ride-share, alcohol consumption or crash rate, city-specific linear time trend
- Results indicate that ride-share is associated with a decrease in nighttime fatal crashes and is primarily caused by people who belong to the age group 19-25 years

Data Science Projects on Prediction and Analysis of Experiments

Aug '17 - Dec '17

- Predicted house prices using lasso linear regression models with mean and median absolute percentage error being 6.5% and 10.8% respectively
- Identified factors contributing to conversion in an online store using logistic regression, evaluated model using true positive rate and false positive rate and used model to draw insights to increase conversion
- Disproved the incorrect initial conclusion that conversion for an e-commerce site decreased due to the introduction of localized Spanish translations, using country level chi-squared tests to re-evaluate the A/B test results
- Modeled the likelihood of fraud in an online store using Random Forests. Used the model and data visualizations to identify important predictors of fraud namely (i) week of purchase, (ii) time interval between sign-up and purchase time and (iii) presence of multiple accounts on the same device

Effect of California's Paid Family Leave on fertility rate

Graduate Researcher, University at Albany, SUNY Jan '15 – Jun '17

- Found using a difference-in-differences methodology and the synthetic control method that the paid family leave did not affect fertility rates
- Implemented [R package](#) for the Webb Cluster Bootstrap method to tackle the problem of correlation among errors within states to obtain statistical significance of the effect

TEACHING & LEADERSHIP EXPERIENCE

Instructor, *Principles of Economics I: Microeconomics*, University at Albany, SUNY Fall '15 & Spring '16

- End-to-end responsibility of the course from syllabus to exam papers for a class of ~90 undergraduates

Instructor, *Tools of Economics*, University at Albany, SUNY Spring '15

- Taught, supervised, held office hours and graded a class of ~30 undergraduates

Teaching Assistant, University at Albany, SUNY Spring '14 & Fall '14

- Tutored undergraduate students for intermediate Microeconomics & Macroeconomics
- Managed and updated the Economics department website
